SUMMARY

UI/UX Designer with 2+ years of experience designing and building digital products end-to-end — from user research and wireframes to production front-end code — across healthcare, telecom, and non-profit, plus academic and concept work in fintech and housing. I combine UX design with front-end development: design-to-dev handoffs that work, accessibility built in from the start (WCAG 2.1 AA), and a good sense of why something isn't working before I redesign it. Comfortable owning a project from research through a shipped, production-ready interface, and working closely with product, engineering, and other teams in Agile sprint environments. Currently a Graduate Research Assistant, using UX research methods — interviews, data analysis, and competitive benchmarking — in an academic setting.

SKILLS & ABILITIES

Design

Figma, Adobe XD, Photoshop, Illustrator, Sketch, Wireframing & Prototyping

Development

React, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Git

Research

User Interviews, Usability Testing, Journey Mapping, Information Architecture, Behavioral Data Analysis, Competitive Benchmarking

Tools: Figma · Adobe XD · Miro · FigJam · Jira · Zeplin · Git

Process & Methodology: Agile/Scrum · Design Systems & Design Tokens · WCAG 2.1 AA Accessibility

EXPERIENCE

GRADUATE RESEARCH ASSISTANT — ETOBICOKE, ON

Jan 2026 – Present

Humber College

- Support faculty-led research in web technologies and user experience design, reviewing existing studies and pulling together usability findings for academic and applied projects.
- Apply UX research methods — user interviews, data analysis, and competitive benchmarking — in a shared academic setting.
- Contribute to research reports and presentations that document study results.

GRAPHIC DESIGNER — TORONTO, ON

Jan 2026 – Present

B12Feed

- Own visual design for a 50-screen platform, creating a clear visual hierarchy and turning wireframes into high-fidelity Figma designs across 3 separate brand guidelines.

FRONTEND DEVELOPER — TORONTO, ON

Sept 2025 – Dec 2025

B12Feed

- Built and maintained responsive React.js components for a live web platform, turning Figma designs into pixel-perfect, accessible interfaces with HTML5, CSS3, and JavaScript.
- Worked with design and backend teams in an Agile setup — daily stand-ups, code reviews, and shipping cross-browser UI within tight sprint deadlines.
- Focused on speed, responsiveness, and visual consistency across the product.

SOFTWARE & UI/UX LEAD — WATERLOO, ON

Sept 2024 – Sept 2025

OHANA™ | Enterprise B2B Telecom Platform

- Led software and UI/UX work for a product team at a telecom platform; managed a team of 4 developers, running code reviews and bug-fixing sessions to keep releases stable.
- Built and launched responsive, mobile-first pages using React and CSS, so the platform worked well across devices as it grew fast.
- Led UX strategy and design-system work, improving task completion across 3 core product flows.
- Ran design workshops, journey mapping sessions, and usability tests, shaping 12+ design changes reviewed by stakeholders and engineers.
- Maintained design-system components and documentation in Figma, so web and responsive interfaces stayed consistent and accessible (WCAG 2.1 AA).

UI/UX DESIGNER — CHENNAI, INDIA

Jan 2022 – Aug 2024

MediGuru | Regulated Healthcare SaaS Platform

- Designed complete user experiences for a healthcare SaaS platform used by patients and medical professionals, covering 3 core modules — onboarding, dashboards, and appointment booking — in a highly regulated industry.
- Delivered wireframes, user flows, and high-fidelity Figma prototypes across key product screens; ran user interviews and reviewed behavioral data to find drop-off points and guide redesign decisions.
- Maintained a growing Figma component library and worked closely with developers to keep the handoff accurate and consistent.
- Built brand identity guidelines and visual design tokens from scratch, cutting cross-platform design inconsistencies by 60%.

SELECTED PROJECTS

Care Calendar — Healthcare Booking Platform Jan – Apr 2026
[Healthcare] [Full-Stack] · Figma, React, Tailwind CSS

- Designed and built a unified healthcare booking system for newcomers, built for one-handed use, reliable syncing on slow connections, and handling 200% more traffic at peak times.
- Used structured task logic to cut down alert fatigue; 94% of users reported less stress, and the redesign cut operational costs by 40%.

WeUnited.ca — Trust-First Matrimony Platform May – Jun 2026
[B2C] [Security/Trust] · Next.js, Tailwind v4, Framer Motion

- Designed an ID-verification and values-based filtering system that matched cultural expectations to a secure digital interface.
- Drove a 40% increase in ID-verified registrations and a 30% drop in profile-filtering fatigue, while keeping Lighthouse performance scores above 95.

CRED — Fintech UX Case Study & Analysis Jun 2026
[Fintech] [UX Research] · Independent teardown, not a client engagement

- Did a UX and behavioral-psychology teardown of a premium neobanking app, studying soft-shadow (neumorphic) visual design, retention mechanics, and trust/security-driven interactions.

EDUCATION

Postgraduate Certificate, Web Development May 2025 – May 2026
Humber College, Etobicoke, ON

Postgraduate Certificate, Game & Interactive Media Design May 2024 – Dec 2024
Conestoga College, Kitchener, ON · Interactive Media Management, Design & Visual Communications

B.Tech, Computer Science June 2018 – June 2022
Adi Shankara Institute of Engineering & Technology, Kalady, India

Infinite Housing — Eco-Construction Licensing Platform May – Dec 2024
[Housing] [Full-Stack] [Capstone] · Figma, React, Tailwind, Node.js, MongoDB

- Built a mobile-first app for iOS and Android to train and license construction professionals in eco-friendly materials (HempCrete), covering onboarding, training modules, and certification.
- Built full-stack features (JWT auth, REST API, MongoDB) and wrote the UX writing/microcopy system to make a new materials category easy to understand for first-time builders.

Ocean Palette — High-Aesthetic B2C Restaurant Platform Feb – May 2026
[B2C] [Brand/Visual Design] · Next.js, Framer Motion, Tailwind

- Designed a rich, high-fidelity dining experience with smooth transitions and a personalized reservation flow.
- A concept project (not deployed) — Lighthouse performance scores held at 95+ despite the image-heavy design.
